# STRUCTURAL SUBSYSTEMS

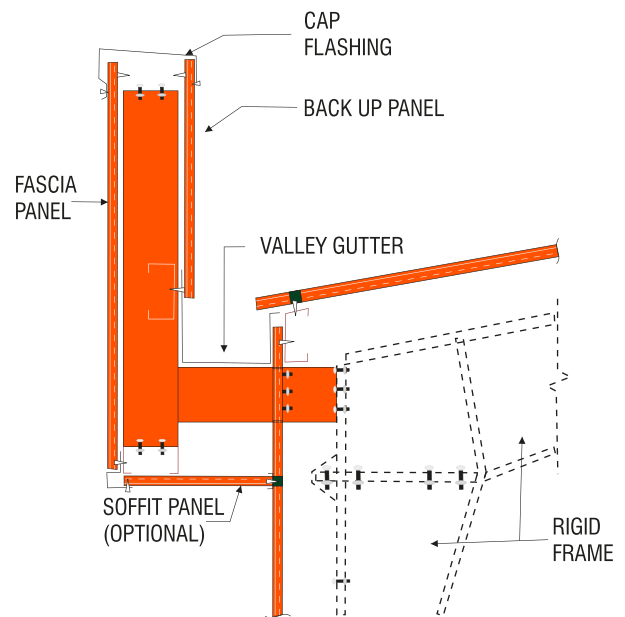

PROTECH PEB Construction:- Pre engineered steel buildings can be fitted with different structural accessories including mezzanine floors, canopies, fascia, interior partitions etc. Fascia is used to conceal the gable roof slop of building. Arkotech Pre-engineered steel buildings can be fitted with different structural accessories. The Buildings made up of Steel where different components of the building are designed, detailed and fabricated in the Manufacturing unit, shipped to and erected at the site. These are provided at the eave level of the roof. This action safeguards the roof and imparts a show-room like appearance to the construction. Following are Different Types of Fascia Used In PEB Construction.

- Canopy
- Curve Eave with projection
- Curved Eave without projection
- Parapet Fascia
- Vertical Fascia with back up Panel
- Top & Bottom Curved Fascia
- Mezzanine Beam Connection
- Mezzanine Joist Connection
